MS Office plug-in

- MS Office integration via a Workplace plug-in:
- Open en publish files directly from and to the Workplace via the Workplace menu.
 - Automatic file-locking, Automatic versioning, integrated security.

O³Spaces Workplace key features

Web 2.0 AJAX web-client

O³Spaces' web based Workplace environment provides the main graphical user interface accessible with a web browser. It presents organized, easily accessible workspaces for teams, workgroups and projects. It houses powerful advanced search functions that allow full text search of ODF, PDF and MS Office documents.

Desktop integration

Stay up to date without having your web browser open. The Workplace Assistant provides real-time notification on all relevant changes in your workspaces. It offers a universal Workplace file browser allowing you to upload files and folder by drag & drop. The Workplace Assistant also automates all necessary document retention and versioning activities when you work on your documents. It provides easy navigation to your workspaces, allows for off-line work and offers direct control on your locked files.

OpenOffice.org / StarOffice & MS Office integration

Open shared files from your workspaces, or publish your document to a team-space directly from your Office application. Collaborate and enhance your office productivity without having a web browser open.

Template Management

The Workplace offers integrated Template Management for OO.o / SO enabling the automated versioning and distribution of document templates in your organization. Based on the roles and rights system OpenOffice.org users get a personalized and up to date overview of the document templates that are available and relevant.

LDAP Integration

Your organization's users, groups and credentials can be imported from your existing LDAP service. The Workplace supports various standards, such as, OpenLDAP, Active Directory, Sun Directory Server and Novell Directory Server.

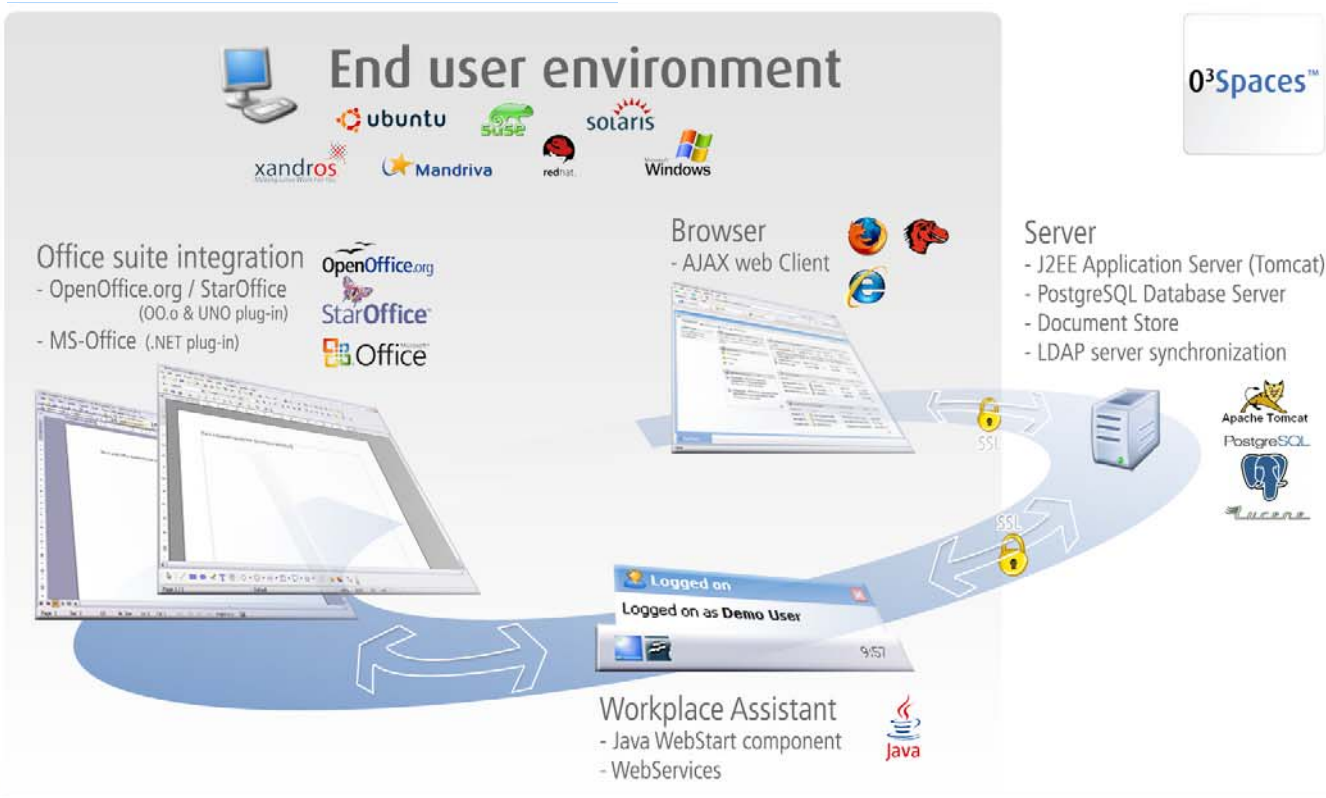

Cross platform

O³Spaces Workplace provides you freedom of choice, whether you use a Linux, Solaris or Windows desktop, O³Spaces will provide its full range of functionality, web-client, desktop integration and Open Suite integration.

Localizations

Work in your own native language. O³Spaces supports multiple interface languages (currently Dutch, English, French, German, Spanish, Swedish and Polish) and new localizations can be added easily.

Architecture Overview

Try O³Spaces Workplace
